1. EXECUTIVE SUMMARY

On March 11, 2021, the \$1.9 trillion American Rescue Plan Act (ARPA) was signed into law by President Biden to address the continued impact of the COVID-19 pandemic on the economy, public health, state and local governments, individuals, and businesses. The legislation established \$350 billion in Coronavirus State and Local Fiscal Recovery Funds (SLFRF) specifically for state, local, territorial, and tribal governments to use in responding to the COVID-19 pandemic, addressing its economic fallout, and laying the foundation for a strong and equitable recovery. Tulare County's share of the SLFRF is \$90,552,914. These funds are intended to cover eligible costs incurred from March 3, 2021, through December 31, 2024.

In accordance with the Interim Final Rule and the Compliance and Reporting Guidance adopted by the U.S. Department of the Treasury, the County prepared the following Interim Recovery Plan, which outlines the County's intended use of ARPA funds and reports on actual expenditures during the first reporting period starting from the date of award through July 31, 2021. The County will publish and submit this Plan to the U.S. Department of the Treasury by August 31, 2021.

Over the next three years, Tulare County intends to utilize its ARPA funds to respond to the public health emergency, address negative economic impacts, support essential workers, and make strategic investments in water, sewer, or broadband infrastructure to support an equitable recovery from the pandemic. The total budgeted funds for each eligible expenditure category are listed in the table below. Amounts may be subject to modifications based on community needs, operational needs, and as determined by the Board of Supervisors:

ARPA EXPENDITURE CATEGORY	BUDGET	CUMULATIVE EXPENDITURES TO DATE	BALANCE
1. Public Health	\$59,495,682	\$540,048	\$58,955,634
2. Negative Economic Impacts	\$4,425,000	\$0	\$4,425,000
3. Services to Impacted Communities	\$5,600,000	\$0	\$5,600,000
4. Premium Pay	\$5,800,000	\$690,000	\$5,110,000
5. Infrastructure	\$14,558,000	\$0	\$14,558,000
6. Revenue Replacement	\$0	\$0	\$0
7. Plan Administration	\$674,232	\$4,330	\$669,902
	\$90,552,914	\$1,234,378	\$89,318,536

During the initial reporting period ending July 31, 2021, the County utilized \$1,234,378 in ARPA funds to provide premium pay to essential county employees and to cover incurred expenses by Health and Human Service Agency (HHSA) responding to the public health emergency.

KEY OUTCOMES

Tulare County is considered an economically distressed region of the country. Prior to the COVID-19 pandemic, its rates of unemployment, and poverty were consistently higher than the statewide and national averages, median household income was low, and nearly half of residents received some form of public assistance. The COVID-19 pandemic and the necessary actions taken to control the spread have worsened the already distressed situation for many of the County's

most vulnerable populations. At the height of the emergency, farmworkers were testing positive at a rate of seven to one compared to the overall population, unemployment rates spiked to 13.2%, and the increased demand for public assistance placed an added strain on County pandemic-response resources. In response to the disproportionate toll the COVID-19 pandemic has taken on this region, the County intends to use its SLFRF allocation to fund projects and programs that mitigate the spread of COVID-19 within the County, assist the economic recovery of local businesses and industries that have lacked other sources of support through the pandemic, and build resilience in disadvantaged and underserved communities through housing support and infrastructure improvements.

2. USE OF FUNDS

This section outlines the guiding principles utilized by Tulare County to strategically allocate ARPA funds and further details the intended use of funds over the next three years.

GUIDING PRINCIPLES

In addition to facilitating the County's response to the COVID-19 pandemic and addressing its negative impacts on residents, ARPA funds provide a unique opportunity for the County to complete projects and programs that will have a transformative and lasting impact on county services and the community. In this spirit, the County established the following principles to guide the allocation and use of ARPA funds.

- **Be Transformational**. Pursue projects or programs that solve an ongoing problem and make a long-term and sustainable difference in the community.
- One-Time Uses. Consistent with the County's budget protocols, allocate one-time ARPA dollars to projects or programs with a defined funding period that do not create an ongoing fiscal obligation for the County.
- Health & Safety. Support the public health and safety response to COVID-19, which includes addressing the
 pandemic's ongoing health and safety impacts and building resiliency to better prepare the County for future
 disasters.
- **Equitable Outcomes**. Prioritize projects or programs that aim to increase equitable recovery and future resilience for disadvantaged or unincorporated communities.
- Data-Driven. Prioritize evidence-based projects or programs or contain the necessary data to demonstrate how
 they will address the impacts of the COVID-19 pandemic or assist in recovery.
- Shovel-Ready. Prioritize shovel-ready infrastructure projects that can be completed within the defined funding period.
- **Close Funding Gaps**. Prioritize funding for industries that experienced negative economic impacts due to the pandemic but did not receive other sources of funding or relief.
- **Avoid Duplication**. Ensure funded projects or programs do not duplicate services approved or administered by the state or federal government, including duplication of efforts of cities.

DETAIL BY FUNDING CATEGORY

The following further details the intended use of SLFRF funds by expenditure category. Funding will be used to respond to the COVID-19 emergency; address the negative economic impacts caused by the public health emergency; provide services to underserved populations and communities disproportionately impacted by COVID-19; provide premium pay to county essential workers; and improve County and community infrastructure to respond effectively and efficiently to the current and future public health emergencies.

The County's proposed projects and programs included in this plan are subject to change based on guidance and clarification from the U.S. Department of the Treasury, and changes in resource demands associated with the pandemic. Throughout the ARPA funding cycle, the County intends to prioritize COVID-19 testing, vaccination, and other emergency response activities. Should these activities require additional funds to address County needs, ARPA funding will be redirected away from other proposed projects and toward these specific public health activities. Major modifications, such as, adding new projects or programs, removing projects and programs, or any change in dollar amount allocations greater than +/- 5% per ARPA Expenditure Category will be brought back to the Board of Supervisors for direction and approval.

PUBLIC HEALTH

- **COVID -19 Vaccination** Vaccination programs for residents of Tulare County are intended to mitigate the health impacts and reduce the number of deaths caused by COVID-19. In addition to administering currently available vaccines, the County anticipates using ARPA funds to organize and administer a vaccine booster in future years.
- **COVID-19 Testing** Provide an employee and countywide testing program to serve the communities of Tulare County for mitigation and prevention of the COVID-19 virus.
- Personal Protective Equipment (PPE) The County anticipates a sustained demand for PPE among staff and
 outside medical agencies as organizational policies change to require the use of PPE in daily operations. PPE
 protects staff and mitigates the spread of the COVID-19 virus among county employees as they perform their
 essential functions of serving the public and maintaining county operations. Demand for PPE may increase should
 the County experience another surge in COVID-19 cases during the recovery plan period. Therefore, ARPA funding
 has been set aside to address this potential cost.
- Capital Investments or Physical Plant Changes to Public Facilities These capital projects would improve the
 County's response to the COVID-19 public health emergency. The HVAC projects would assist in mitigating the
 spread of the COVID-19 virus in county buildings by improving ventilation in congregate settings. Radio Tower
 projects would allow better medical and public safety responses to Tulare County communities, including
 disadvantaged and isolated communities in the mountainous areas.
- Other COVID-19 Public Health Expenses (including Communication, Enforcement, Isolation/Quarantine) The
 County will provide communication messaging and outreach to residents and communities within Tulare County
 regarding COVID-19 vaccinations and testing; provide facilities for quarantining the homeless and jail inmate
 populations with COVID-19; improve teleworking and video conferencing to allow for social distancing while
 maintaining the continuity of essential County operations; and enhance outdoor and green space areas for
 residents and communities to remain active and socially distanced during this public health emergency.

- Payroll Costs for Public Health, Safety, and Other Public Sector Staff Responding to COVID-19 County departments with staff directly or substantially dedicated to responding to or mitigating the COVID-19 public health emergency will use ARPA funding to cover the associated payroll costs of those employees.
- Other Public Health Services Other COVID-19 expenditures include technology expenditures to continue County public health operations and provide services to the public. These technology projects would digitize records and allow for teleworking so that the County may continue to provide socially-distanced services to the public, residents, and communities of Tulare County online.

NEGATIVE ECONOMIC IMPACTS

- Small Business Economic Assistance Assist local small business through an Environmental Health Fee waiver.
- Aid to Nonprofit Organizations Develop programs in collaboration with local nonprofit organizations to assist those in Tulare County impacted by the public health emergency.
- Aid to Impacted Industries Provide assistance to the County libraries for modification of services that mitigate and prevent the spread of COVID-19, and aid industries impacted by the public health emergency, such as museums, memorial districts, and other community service districts, that have not received other sources of pandemic relief.

SERVICES TO DISPROPORTIONATELY IMPACTED COMMUNITIES

The County recognizes that individuals experiencing homelessness have been particularly hard hit during this pandemic, and will use SLFRF funds to develop projects that provide housing support and allow for homeless populations to safely quarantine during the pandemic.

PREMIUM PAY

County employees deemed essential workers and eligible under the guidelines set forth by the U.S. Department of the Treasury, were given \$1,500 in premium pay for their continued work throughout the pandemic. County workers are considered disaster workers by ordinance. During the COVID-19 pandemic, county workers were deemed essential via emergency order to maintain the continuity of critical services that ensure the safety, health, and wellbeing of county residents.

INFRASTRUCTURE

- Clean Water Projects The following projects meet a critical sewer infrastructure need for the identified disadvantaged and underserved communities: Ivanhoe Public Utilities District (PUD) Disposal Pond Improvements, Tipton Community Services District (CSD) Wastewater Treatment Plant Improvements, and Earlimart PUD Interceptor and Relief Sewer Project.
- Drinking Water Projects The following projects meet a critical drinking water infrastructure need for the
 identified disadvantaged and underserved communities: Tipton CSD North Burnett Road Water Line Replacement,
 Avenue 264 Water Main Extension, Pixley PUD Water Main Extension, Poplar CSD Well Replacement, Earlimart
 Front Street Well Treatment, Tipton CSD Well Number Six, Cutler PUD Well Number Ten, Strathmore PUD Well
 and Treatment, Strathmore PUD Tank Repair, Chinowth Street Apartments Fire Hydrant, Earlimart PUD Clay West
 Well Sound Wall, and Orosi PUD Well Number Five Auxiliary Power.

ADMINISTRATIVE

The County will fund direct and indirect SLFRF administrative costs for implementation of projects and programs. Administering and developing the County's Recovery Plan will require the oversight of the County Administrative Office, Auditor's Office, and County Cost Centers (e.g. Health and Human Services Agency, Information and Communications Technology Department, and the General Services Agency). Administrative funds may also be used to hire a consultant to take over administration, monitoring, and reporting associated with the County's Recovery Plan. The proposed consultant would support effective management and oversight, ensuring compliance with legal, regulatory, statutory, and other requirements.

PROJECT AND PROGRAM PHASES

Projects and programs will be completed in their assigned phase unless otherwise noted. Due to scope and complexity, some projects and programs may be completed over multiple phases. Other projects may be developed at a later date, currently noted a "To Be Determined." The phases outlined below are projected start and completion timeframes and are subject to change, as determined by the County Administrative Officer, based on direction from the Board of Supervisors and the U.S. Treasury's Final Rule, guidance, and clarification.

Phase II: July 2022 through June 2023. Phase III: July 2023 through June 2024.

Phase IV: July 2024 through December 31, 2024. If funds are obligated by December 31, 2024, they may be expended by

December 31, 2026.

3. EQUITABLE OUTCOMES

Tulare County is composed of eight incorporated cities and numerous unincorporated communities and hamlets, including 17 qualified census tracts, designated as disadvantaged communities. According to the Distressed Communities Index, which evaluates the economic well-being of communities across the US, the County is an economically distressed area. Approximately 23.8% of the population lives at or below the poverty level, more than 30% of adults 25 and older do not have a high school diploma, and more than 30% of adults aged 25 to 54 are not working or not in the labor force. Countywide, the median household income is 79% of the national average and 66% of the state average.

The projects and programs detailed in this plan were selected to help all Tulare County communities, but with special consideration for the disadvantaged and underserved communities who experienced a greater negative economic and social impact as a result of the COVID-19 public health emergency. The Plan focuses on projects and programs that may facilitate economic prosperity in disadvantaged communities and hasten a full recovery from the pandemic. Specific areas of focus include public health and safety protection, emergency medical services, reliable communication infrastructure, access to county services, and access to clean, safe, and sustainable water sources.

4. COMMUNITY ENGAGEMENT

The SLFRF parameters provide substantial flexibility for each jurisdiction to decide how to best meet the needs of their local communities and allow for flexible spending up to the level of their revenue loss. The County, through public comments at Board of Supervisors meetings, Board of Supervisors Town Halls, Government Affairs Committee meetings (City Chambers of Commerce), community council meetings, Board Of Supervisors Monthly Message (County website, Facebook, and Twitter), county constituent contacts, and internal county meetings, has developed a recovery plan, following SLFRF guidelines and community input to:

- a. Respond to the public health emergency or its negative economic impacts, including assistance to households, small businesses, and nonprofits, or aid to impacted industries such as tourism, travel, and hospitality.
- b. Respond to workers performing essential work during the COVID-19 public health emergency by providing premium pay to eligible workers.
- c. Provide government services to the extent of the reduction in revenue due to the COVID–19 public health emergency relative to revenues collected in the most recent full fiscal year prior to the emergency.
- d. Make necessary investments in water, sewer, or broadband infrastructure.

As part of this plan, the County will disseminate information through its social media sites, community-based organization partners, Board of Supervisor meetings, Town Halls, Government Affairs Committee meetings, and community council meetings to ensure employees, residents, and businesses of the County are aware of the services funded through SLFRF.

5. LABOR PRACTICES

County labor practices will follow and comply with all local, state, and federal laws, regulations, and directives. This includes compliance with all laws and regulations pertaining to wages and hours, state and federal income tax, unemployment insurance, Social Security, disability insurance, workers' compensation insurance, and discrimination in employment. The County, its contractors, and subcontractors shall comply with Title VI of the Civil Rights Act of 1964, and in accordance with said Act, no person on the grounds of race, color, sex or national origin, shall be excluded from participation in, be denied the benefits of, or be otherwise subject to discrimination under any service or activity in connection with any public works project.

With regard to public works projects, the County, its contractors, and subcontractors shall pay all workers employed on public works projects not less than the prevailing wage rates determined by the Director of the Department of Industrial Relations and shall comply with all laws and regulations relating to the employment of apprentices. Said wage rates pursuant to Section 1773.2 of the Labor Code are on file with the Tulare County General Services Agency, 2637 W. Burrel Avenue Suite 200, Visalia, California and will be made available to any interested person on request.

No contractor or subcontractor may work on county public works projects unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. According to Labor Code section 1776, contractors and subcontractors are required to keep an accurate record showing the names, occupations, and actual per diem wage of all laborers, workers and mechanics employed by it in connection with county public works projects.

6. USE OF EVIDENCE

The plan considers the use of evidence-based programs and identifies them on the Tulare County Interim ARPA Recovery Plan Project List - Attachment B.

7. EXPENSES BY EXPENDITURE CATEGORY

1.1	COVID-19 Vaccination ^					
	-	HHSA support for vaccine administration by community partners	HHSA	\$	2,500,000	X
	Project ID #:	HHSA has and continues to establish agreements with healthcare partners to				
	Description.	assist with COVID-19 vaccine administration. The \$2.5M would be used after				
		Epidemiology and Laboratory Capacity (ELC) funds have been maximized.				
		Additionally, there may be the need to administer booster vaccines in the				
		future. This funding would allow the Agency to reimburse partners for the				
		administration of approximately 45,450 vaccines (\$55/dose).				
	F. 1 88	Market the state of the California Health Bloom to		_		
	Equity Measures:	Vaccination strategies are informed by the California Healthy Places Index (HPI), which identifies which communities are most disadvantaged or at-risk.				
		Tulare County has used this index to identify the zip codes that are most				
		vulnerable, and vaccination events and activities in these underserved areas				
		are prioritized. In addition to this strategy, Tulare County also developed a GIS				
		Mapping tool to identify vaccine registered providers in the County. This tool				
		extended the ability to identify where within the county/communities under the				
		Q1 HPI quartiles needed providers to be registered as vaccine providers. This				
		was addressing health equity by targeting the commuting distance to a vaccination location and decreasing transportation inequities. Accessibility is				
		addressed by locating vaccine events and providers within the communities				
		that may have low vaccination rates. For example, if a community falls under a				
		specific percentage, like under 30% being vaccinated, this draws the attention				
		to set these communities as priorities and schedule vaccine events in that				
		community. The project will be able to sustain these vaccine efforts by making				
		sure that these well-established locations are kept active in these communities				
		for consistency access to the residents.				
	Performance	As noted above, this funding would provide approximately 45,450 vaccine				
	Indicators:	doses. The County will measure the progress of the project by measuring both				
		the overall County vaccination rate as well as vaccination rates by zip code.				
		Weekly reports are being compiled by Tulare County Epidemiology team to				
		demonstrate the percentage of vaccination among the priority communities, to				
		identify where the needs are and what planning should take place to increase/improve the percentage.				
		increase/improve the percentage.				
	Project Status	Ongoing				
	^ Serving	Yes, 19 communities were identified to be under the 25% quartile. These are				
	•	priority communities to be reached.				
	communities:			_		
	Project Name:	Response Team Support	HHSA	\$	26,711	X
	Project ID #:		IIIISA	,	20,711	A
		Due to the nature of the vaccine point of distribution (POD) events, volunteers				
		and staff working at these events are not able to leave the location, or there is				
		not enough time to leave and get food; therefore, food has been provided.				
		Covers primarily period from March through May during period of intensive				
		vaccination efforts, plus a small amount to pay for food during any potential				
	Equity Measures	surges. POD vaccination events were planned trough out Tulare County. The number of				
		events increased with the demand of the vaccine. Many of the events were				
		hosted in underserved communities in the County. The volunteers were key in				
		making the events successful.		_		
		There were over 100 volunteers who assisted during the POD events.				
	Indicators: Project Status	Ongoing				
	-	Staff support vaccination events in disadvantaged and underserved				
	disadvantaged					
	communities:					
1.2	COVID-19 Testing ^	COVID Testing for Tulare County Employees	HHSA	\$	200,000	Х
	Project ID #:		IIIISA	,	200,000	A
	•	Contract with the vendor Color to make COVID-19 testing available for Tulare				
		County staff members. Testing is an important measure to mitigate and contain				
		the COVID-19 disease.		_		
	Equity Measures:	Tulare County is establishing a testing program for its employees. Tulare				
		County staff are considered essential workers, and have been assisting with responding to the COVID-19 pandemic. These testing sites will be located				
		through out County facilities, in addition to testing sites available to County				
		residents.

	disadvantaged	located in, and serve disadvantage communities. The testing sites for staff will			
	communities:	be located in some of these communities.			
1.3	COVID-19 Contact Tracing				
1.4		Settings (Nursing Homes, Prisons/Jails, Dense Work Sites, Schools, etc.)*			
1.5	Personal Protective Equipm		LILICA	\$ 1,073,279	X
	Project ID #:	PPE for HHSA Staff	HHSA	\$ 1,073,279	A
		Employees continue to use PPE in the office. Funds would cover Cintas monthly			
		order of masks and hand sanitizer stations. Expense serves approximately 2,000			
		Agency staff, plus members of the public on a monthly contracted basis. On July			
		26, 2021 the State Public Health Officer issued an order, effective August 9, that			
		requires workers in certain facilities to wear FDA-cleared surgical masks and			
		follow CDC masking guidelines. This applies to: A) Acute Health Care and Long-			
		Term Care Settings; B) High-Risk Congregate Settings; and C) Other Health Care			
		Settings. These supplies would be procured outside of the Agency's agreement			
		with Cintas which provides cloth masks and hand sanitizer stations for			
		employees and clients.			
	Equity Magazine	DDE will carrie Agancy staff, plus mambers of the public which includes			
	Equity ivieasures:	PPE will serve Agency staff, plus members of the public which includes a significant number of disadvantaged communities and populations			
	Parformance	PPE will be purchased and distributed to employees to use in the office,			
		including masks, and hand sanitizer stations.			
		Less than 50% Completed			
	,				
	Project Name:	Distribution of PPE for other Tulare County institutions responding to COVID-	HHSA	\$ 1,522,000	Х
		19			
	Project ID #:	1005			
	Description:	This funding is primarily reserved for any potential COVID-19 surge in the			
		County. Given the widespread demand that hospitals, nursing homes, doctor's			
		offices, dental clinics, and other small businesses have shown in the past for			
		PPE, a surge in COVID-19 cases could easily require this much funding for PPE,			
		and possibly more. Supplying PPE keeps the disease contained, and could help			
		small businesses stay open when they might otherwise have to close due to an inability to meet disease-mitigation requirements. This project considers that			
		manufacturers have previously raised their prices in the event of widespread			
		PPE shortages, and the proposed amount is reasonable, should COVID-19 cases			
		take a sharp increase in the next few months.			
	Equity Measures:	PPE will be provided throughout the County which includes underserved and			
		unincorporated areas. It will also be provided to healthcare workers who			
		provide services in these areas.			
		The goal is to procure surgical masks, gloves, and N95 masks and distribute			
		throughout the County.			
	Project Status	Not startea			
1.6	Medical Expenses (including	ng Alternative Care Facilities)			
	Project Name:	-	HHSA	\$ 3,000,000	Х
	Project ID #:			,,,,,,,	
		Public Health will provide additional funding to local hospitals to assist with			
		COVID-19 mitigation measures through testing and vaccination. These funds			
		will also provide for COVID-19 safety measures in the emergency room and in-			
		patient rooms.			
	Equity Measures:	This project was designed to assist community partners with providing direct			
		patient care through mobile clinics and street medicine teams as well as			
		enhanced services provided through the emergency room. The three recipient			
		hospitals in Tulare County serve all residents of the County, including			
		underserved communities and residents who live in qualified census tracts.			
	Performance	The hospitals will be presenting work plans to provide testing and vaccination			
		services to unincorporated and underserved areas of the County. This includes			
		both direct patient care and the supplies needed to accomplish these tasks.

Dept

PHASE I PHASE III PHASE IV

- ^ Must report if projects are primarily serving disadvantaged communities:
- * Must identify total funds allocated to evidence-based interventions:

Project Status	Less than 50%				
Project Name:	COVID-19 Vaccine and Testing Outreach	HHSA	\$	100,000	Х
Project ID #:	1032				
Description:	Additional messaging and outreach activities may be necessary beyond				
	activities planned in scope of the ELC Expansion project. ELC Expansion includes				
	\$200K for outreach and messaging. Messaging and outreach efforts can reduce				
	vaccine hesitancy and thereby possibly prevent or reduce potential resurgences				
	of COVID-19.		-		
equity ivieasures:	Outreach and media activities target the most disadvantaged and underserved communities in the County. For example, radio and TV ads are aired in both				
	English and Spanish in order to reach the Spanish-speaking population, which				
	has been identified as high-risk. Also, as a rural county, media are selected to				
	ensure maximum accessibility to the remote populations (e.g. radio instead of				
	the internet). The majority of the efforts with media and communication has				
	been driven by the communities identified among the lower HPI quartiles.				
	Tulare County has worked with billboard vendors to promote vaccination				
	efforts and increase intention and health behavior surrounding vaccine				
	hesitancy in19 census tracts having the lowest HPI scores , under 25%. In				
	addition to billboards, Tulare County's website has an accessible COVID-19				
	Tulare County Data and Information dashboard and links to vaccination and				
	testing resources. In addition to this, the County uses Facebook, Twitter, and YouTube accounts to post vaccine events, vaccine/testing registration links,				
	updates, advisories, and guidance that are made public. Collaborations with				
	radio stations have been established and are continued to be worked with. This				
	channel is used to promote the vaccine events in Tulare County and the				
	Community-Based Organizations (CBO) efforts. CBO partnerships have been				
	supporting the media outreach as well by reaching out to communities and				
	promoting events on their media platforms. Overall, all efforts have been done				
	collaboratively to continue promoting accessibility, affordability, and				
	acceptability of testing and vaccination for COVID-19.				
Performance	As the outreach and media will be aimed at reducing vaccine hesitancy,				
Indicators:	vaccination rates will be measured in the targeted communities to measure the				
	success of the project. Weekly reports are being compiled by Tulare County				
	Epidemiology team to demonstrate the percentage of vaccination among the				
	priority communities, to identify where the needs are and what planning				
	should take place to increase/improve the percentage.				
Project Status	Not started				
Project Name:	Alpaugh Park	GSA	\$	853,500	X
Project ID #:					
Description:	Project: Replace one (1) arbor and (3) grills. Install irrigation system and				
	electrical system.				
	Project Timeline: Replace arbor and grills by June 30, 2022, install irrigation				
	system and electrical system by June 30, 2023.		1		
	Intended Outcomes: Addressing health disparities and the social determinants of health, building stronger paintherhoods and communities, and promoting				
	of health, building stronger neighborhoods and communities, and promoting healthy childhood environments by improving the park. The Park provides				
	space and amenities for play and exercise for the Alpaugh community.				
	Additionally, the park is used for social gatherings which will assist in bringing				
	the community back together as recovery efforts begin for the COVID-19

A florage section of Porterville is a Qualified Census Tract. According to The U.S. Census Bureau, the median household income of Tule River Reservation and Off-Reservation Trust Land is \$25,558. Additionally, Tulare County has high rates of poverty, obesity, and food insecurity (University of CA, Col Fresh Healthy Living). By improving the Park, it gives greater opportunity for residents to exercise, children to play, and family and friends to gather. Residents will be made aware of any modifications to the park via social media and through partner collaborations working in the community. Demographics of Porterville: 47,75% Hispanic White, 25,64% non-Hispanic White, 15,72% Other race, 63% Black or African American, 1.09% Native Hawaiian and Other Pacific Islander.					
access to drinking water and water for hand washing. The Pork provides space and amenities for play and exercise for the Porterville community. Additionally, the park is used for social gatherings which will assist in bringing the community back together as recovery efforts begin for the COVID-19 pandemic. Outdoor space and socialization can also assist in improving psychological health. An article published in the February 2019 issue of the International Journal of Environmental Research and Public Health states, "The presence of urban green spaces can encourage positive social interactions that cultivate social cohesion in ways that enhance health and well-being. Urban green spaces have also been linked to positive health behaviors and automes including increased physical activity and social engagement" (Jennings & Bamkole, 2019). Jennings, V., & Bamkole, O. (2019). The Relationship between Social Cohesion and Urban Green Space: An Avenue for Health Promotion. 	and Urban Green Space: An Avenue for Health Promotion. International Journal			
	of Environmental Research and Public Health, 16(3), 452.			
	doi:10.3390/ijerph16030452			
Equity Measures:	Woodville is a rural disadvantaged community with limited access to services			
	which has a population of 1,763. The average household income is \$41,676			
	with a poverty rate of 39.85%. By improving the Park, it gives greater			
	opportunity for residents to exercise, children to play, and family and friends to			
	gather. Residents will be made aware of any modification to the park via social			
	media and through partner collaborations working in the community.			
	Demographics of Woodville: 77.54% Hispanic White, 6.29% non-Hispanic			
	White, 11.12% Other race, 1.36% Native American, 3.29% identify as two or			
	more races, and .40% Asian. Although Woodville is not in a Qualified Census			
	Tract, the population of 1,245, within half a mile of the Park is disadvantaged.			
	The median household income for this area is \$29,052. Additionally, Tulare			
	County has high rates of poverty, obesity, and food insecurity (University of CA,			
	Cal Fresh Healthy Living). By improving the park, residents will have a place to			
	go for activity and exercise to attempt to offset poor health outcomes. Over			
	25% of intended beneficiaries are below the federal poverty line.			
Performance	Compare arbor reservations pre and post improvements.

· · · · · · · · · · · · · · · · · · ·	To mitigate the effects of the COVID-19 public health emergency within Tulare County jail facilities, the Sheriff's Office has dedicated five of eight housing modules at its Pre-Trial Jail Facility. The designated housing modules are utilized strictly for COVID-19 observation, quarantine, and isolation. All arrests are housed in observation units for a minimum of 14 days before qualifying to go to regular housing. Any deemed outbreak within any designated module at the Pre-Trial Facility becomes locked down. Inmates are medically screened/assessed; COVID-19 tests are administered on days 1, 7, and 14. If no signs/symptoms are present and results are negative for COVID-19, the affected module is taken off quarantine status. Suspect Forms and Contact Tracing are completed by medical, HHSA, HR&D, and/or designated Infectious Control Officer within the Sheriff's Office. Free COVID-19 education (verbal, pamphlet, and video) and free COVID-19 vaccinations for inmates are offered during bookings and while housed within any Sheriff's Office jail facility. Mandatory Personal Protective Equipment (PPE) is issued and regularly replaced and enforced within all jail facilities. Trainings for all staff with occasional repeat training as reminders to establish and/or any new State or County COVID-19 guidelines will be done regularly. Through the County Health Officer, Health & Human Services Agency, and jail medical provider, Wellpath, the Sheriff's Office created and will sustain best practice workflow charts for covid prevention amongst inmates, staff, and the

- ^ Must report if projects are primarily serving disadvantaged communities:
- * Must identify total funds allocated to evidence-based interventions:

				a a a
		Dept	Total Project Cost	PHASE I PHASE III PHASE
Equity Measures:	All arrests, regardless of race, ethnicity, age, religious background, gender,			
	medical ailment, education level, mental health needs, or other beliefs are			
	received, booked, and classified for housing in observation units for a minimum			
	of 14 days before qualifying to go to appropriate regular housing within one of			
	three Sheriff's Office jail facilities. Placecards are posted in various locations in			
	each housing units/modules in both English and Spanish that explain the			
	categories of observation, quarantine, and isolation.			
	All arrests brought into a Tulare County jail facility are educated about the			
	Covid-19 vaccination by contracted medical staff and are offered the			
	vaccination(s) at no cost to the inmate. All inmates brought in are also			
	educated about the covid testing methods and tested via Rapid and PCR tests			
	at no cost. Any inmate who becomes released before receiving the 2nd dose of			
	the covid vaccination is provided a written referral.			
	This project primarily serves disadvantaged and low-income communities			
	throughout Tulare County. The County comprises approximately 34 towns and			
	cities, of which 17 are in a qualified census tract. All arrests within Tulare			
	County, regardless of where they are from or what community they are from,			
	are tested for Covid-19, educated on Covid-19, offered the Covid-19 vaccination			
	regiment, and housed in observation units for a minimum of 14 days before			
	qualifying to go to regular housing. Inmates are not charged for any medical			
	or mental health services or referrals.			
	•			
Performance	A Dashboard has been created and is sustained with daily statistics for any			
	administered covid tests (positive, negative, or recovered) and for any covid			
	vaccinations (1st dose, 2nd dose, refusals, or released prior to 2nd dose). The			
	Dashboard also maintains any current numbers for those inmates who are in			
	isolation, quarantine and/or positive. It is estimated that 4,500 inmates are			
	booked into a Tulare County jail every three months or quarter. Through this			
	project, the Sheriff's Office strives to have 100% adherence of all booking into a			
	county jail facility screened through the observation/quarantine protocol.

Project Status	Not Started						
Project Name:	Payroll for Sheriff Staff	TCSO	\$	5,212,536	Х	Х	
Project ID #:							
Description:	To mitigate the effects of the COVID-19 public health emergency within Tulare						
	County jail facilities, the Sheriff's Office has dedicated five of eight housing						
	modules at its Pre-Trial Jail Facility. The designated housing modules are						
	utilized strictly for COVID-19 observation, quarantine, and isolation. All arrests						
	are housed in observation units for a minimum of 14 days before qualifying to						
	go to regular housing.						
	Any deemed outbreak within any designated module at the Pre-Trial Facility						
	becomes locked down. Inmates are medically screened/assessed; COVID-19						
	tests are administered on days 1, 7, and 14. If no signs/symptoms are present						
	and results are negative for COVID-19, the affected module is taken off						
	quarantine status. Suspect Forms and Contact Tracing are completed by						
	medical, HHSA, HR&D, and/or designated Infectious Control Officer within the						
	Sheriff's Office.						
	Free COVID-19 education (verbal, pamphlet, and video) and free COVID-19						
	vaccinations for inmates are offered during bookings and while housed within						
	any Sheriff's Office jail facility. Mandatory Personal Protective Equipment (PPE)						
	is issued and regularly replaced and enforced within all jail facilities						
	Trainings for all staff with occasional repeat training as reminders to establish						
	and/or any new State or County COVID-19 guidelines will be done regularly.						
	Through the County Health Officer, Health & Human Services Agency, and jail						
	medical provider, Wellpath, the Sheriff's Office created and will sustain best						
	practice workflow charts for covid prevention amongst inmates, staff, and the						
	public. All Sheriff's Office staff working in these designated units or exposed to						
	the COVID-19 virus, use a special assignment code (C19, C19B, C19R) on their						
	timecards to track all Salary and Benefits costs associated with this project.						
Equity Measures:	All arrests, regardless of race, ethnicity, age, religious background, gender,						
	medical ailment, education level, mental health needs, or other beliefs are						
	received, booked, and classified for housing in observation units for a minimum						
	of 14 days before qualifying to go to appropriate regular housing within one of						
	three Sheriff's Office jail facilities. Placecards are posted in various locations in						
	each housing units/modules in both English and Spanish that explain the						
	categories of observation, quarantine, and isolation.						
	All arrests brought into a Tulare County jail facility are educated about the

	Project ID #:				
	Description:	Tulare County Fire Department (TCFD) provides emergency response service to			
		underserved communities in need of medical aid attention while using			
		universal precautions. TCFD has implemented operational strategies in			
		mitigating COVID-19 exposure and the spread of the virus. The Department			
		has purchased essential Personal Protective Equipment (PPE) and initiated			
		decontamination procedures designed to keep employees and the community			
		safe. When COVID-19 was declared a national pandemic during March 2020,			
		the Department immediately adhered and continues to adhere to strict			
		protocols as outlined by the Central California Emergency Medical Services			
		Agency, FIRESCOPE, and the Centers for Disease Control. Utilizing Designated			
		Infection Control Officers as the primary point, the Department implemented			
		internal protocols to ensure the continuation of emergency services to the			
		community. These protocols continue to be in place and include operational			
		area coordination of PPE and decontamination procedures, daily employee self-			
		health screenings, improved air filtration during oxygen therapy on emergency			
		scenes, and Individual employee Personal Isolation Kits. Fire Dispatch has			
		implemented caller queries for sick persons. Information gathered during a			
		dispatched call is placed in the CAD comments and firefighters are asked to use			
		universal precautions, including wearing N95 masks, gowns, gloves, and other			
		PPE as needed when responding.			
	Equity Measures:	Tulare County Fire serves over 20 disadvantaged and low-income communities.			
		As frontline professionals, Tulare County firefighters continue working through			
		the COVID-19 pandemic to provide services and keep the community safe,			
		regardless of race, ethnicity, age, religious background, gender, medical			
		ailment, education level, mental health needs, or other beliefs. Additionally,			
		Department EMTs have assisted with vaccination efforts and hosted			
		vaccination clinics at various fire stations to reach all surrounding			
		disadvantaged communities.			
	Performance	The Tulare County Fire Department serves a population of more than 460,000.			
		Between December 2020 and June 2021, the Department responded to 5,100			
	indicators:				
		medical aid calls for service. It is anticipated the Department will respond to			
		approximately 12,000 medical calls for service by the end of 2021. The			
		Department will maintain 100% adherence to protocols as outlined by the			
		Central California Emergency Medical Services Agency, FIRESCOPE, and the			
		Centers for Disease Control while responding to medical aid calls for service.			
	A Servina	This project primarily serves disadvantaged and low-income communities			
	-	throughout Tulare County. The County is comprised of approximately 34			
		towns and cities, of which 17 are in a qualified census tract.			
	Project Status	Started			
1.10	Mental Health Services*				
	Substance Use Services*				
1.12	Other Public Health Service				
		Tech Equipment (Adobe Acrobat Licenses, iPad minis for vaccine pods)	HHSA	\$ 250,000	Х
	Project ID #:				
	Description:	Laptops, monitors, docking stations, software licenses, mini-iPads, and Adobe			
		licenses are needed to support HHSA employees as they work from home, in the			
		field, and from the office. This item will cover the expenses incurred during the			
		Vaccine POD activities such as iPad minis needed for registration and tracking.			
		Remaining funds will be utilized to upgrade equipment reaching its end-of-life			
		in HHSA programs.		1	

- ^ Must report if projects are primarily serving disadvantaged communities:
- * Must identify total funds allocated to evidence-based interventions:

				1
Facility Bases and a		Dept	Total Project Cost	PHASE I PHASE III PHASE
Equity ivieasures:	: Provides for continuity of services for public health (disease mitigation & pandemic response), behavioral health (services to address mental health &			
	substance use disorder), and social services (benefits such as cash & food			
	assistance, Medi-Cal,etc.) as well as protection for vulnerable populations (child			
	welfare, foster kids, seniors, etc.) Continuity of services is particularly important			
	for disproportionately impacted communities.			
	E Equipment and licenses will be purchases and implemented to support : telework, HIPAA compliance, privacy and security, and cloud based structures			
Project Status	; Not started			
Project Name:	: ASSESSOR - Electronic Records - Property Folders - Scanning Project	TCiCT	\$ 500,000	X
Project ID #:	: 1048			
Description:	: 1)Description / Major Project activities:			
	Document Imaging and Electronic Records involves physical paper content			
	capture into an electronic format, indexing it according to record type and			
	importing to a custom-designed electronic records archive.			
	2)Project Timeline: less than a year from project start			
	3) Delivery mechanisms: Assessor and County ICT will provide project			
	management; 3rd party contractors to perform document imaging and design			
	of capture system and updates to ERM archive.			
Equity Measures:	: Electronic records help support services to all constituents over the phone or			
	computer without traveling distances to the office, which could be a lengthy			
	trip for those who reside in our rural disadvantaged communities. Electronic			
	records systems that allow staff to work remotely also reduce the impact on			
	our local air quality. The Assessor supports business and community			
	development operations and ongoing County revenues through their work. In			
	particular, the Assessor is making available re-assessments for business			
	property losses tied to COVID-19.			
Performance	e Intended outcomes:			
	• Having the Assessor's paper records digitized would help provide property			
	information to taxpayers requesting information quicker. The public often has a			
	need to access Assesses records when purchasing properties. The Assessor			
	should aim to not cause any unnecessary delays in real estate transactions to			
	keep the market robust.			
	If employees are sent home related to the COVID-19 Pandemic & do not have			
	access to file records, they are unable to process exemptions without a delay in			
	services. These various exemptions save taxpayers money & are vital to			
	economic recovery.			
	Digitized records would allow staff to process deeds from home in the event			
	of an office closure. This would allow the appraisal process to occur in a timely			
	manner resulting in the issuance & collection of supplemental taxes to bring in			
	revenues to the County.

•	Earlimart PUD - Front Street Well	WATER	\$	2,200,000		Х	Х
Project ID #:							
Description:	1) This project provides much needed water quality and quantity to the						
	community of Earlimart. The community currently has 1,2,3 TCP contamination and is need of a treatment system. The treatment improvements will consist of						
	two granular activated carbon (GAC) contactors, a 50,000 gallon backwash						
	waste storage tank, chlorination, metering and storage system,						
	interconnecting piping, valves and appurtenances. The GAC contactors will be						
	connected to the discharge of the well and operate in series. Treated water will						
	be disinfected and flow into the existing hydropneumatic tank. Monitoring of						
	the treated water for 1,2,3-TCP will be used to establish the need to exchange						
	the GAC. 2) This project can be completed in approximately 18 months, once						
	funded. 3) Water infrastructure construction project contracted to an						
	appropriate contractor. 4)There is opportunity for new affordable housing in						
	the community, which would meet both a housing need and improve the						
	economies of scale for the existing residents. The housing is on hold due to lack						
	of capacity in the water system due to contamination. Due to the lack of new						
	housing, the Earlimart School District has experienced a decrease in enrollment						
	by nearly 5%, which negatively impacts the School District's revenue						
Equity Measures:	Earlimart is a Severely Disadvantaged Community with approximately 8,800						
	people. The community is 91.4 percent Hispanic/Latino and 40 percent are						
	under the age of 18.
